REQUEST FOR VOLUNTEERS

THANK YOU for considering to offer your time to help with this historic COVID-19 vaccination programme. The programme is going to last several months and in order for it to succeed we are going to need some help! Volunteers will play a key role in this community effort and we hope that you will find it a rewarding experience.

We anticipate starting our vaccination clinic the week commencing 18th January, and we anticipate clinics could be on any day of the week. The clinic will be located at Royston Health Centre.

The role we would welcome volunteer support with are:

- **Car Park attendants (outside)** – to help greet patients, direct them to appropriate parking area and manage traffic flow. You will need to be active and like talking to people.
- **Meet and Greet (outside)** – you will be the start of the patients journey through the vaccination centre. You will direct them to the appropriate queueing area, check they have an appropriate appointment and direct them to read the signage and patient information
- **Patient flow assistance (outside)** – you will help guide patients from the vaccination area to the observation area. You will need to be active and like talking to people.
- **Observation area (inside)** – you will work in a team (which will include a health professional) in the patient waiting area after the vaccination. You will need to be active and like talking to people.
- **Runner (outside and inside)** – if you can be very active, we will need help shuttling equipment across the site and generally helping out where required!

To register your interest please complete the following survey:

<https://www.surveymonkey.co.uk/r/6XP36SN>

We will arrange appropriate induction and PPE.

So, if you are someone who is active, friendly, enjoys helping people and wants to be involved in this programme **WE WANT TO HEAR FROM YOU!**
